ABOUT ME

CSE graduate passionate about building intelligent systems that solve real-world problems

Hands-on experience in Python, machine learning models, and data analysis

Strong foundation - Python (Pandas , Numpy..), Database (MYSQL), and ML libraries (scikit-learn)

Aim to contribute to developing AI solutions that improve decision-making and efficiency

WHY AM I GOOD FIT ?

Strong foundation in Python (Pandas, NumPy), MySQL, and ML libraries like Scikit-Learn enables me to build, analyze AI-driven solutions.

Experienced in data preprocessing, analysis, and model development through hands-on academic projects and internships.

Familiar with web technologies and GitHub, allowing me to collaborate and contribute to end-to-end AI and software development workflows.

Developed strong teamwork, communication, and problem-solving skills through leadership and community engagement experiences.
